● NOW® SPORTS PRODUCTS ●

At NOW® Sports, we are all about unadulterated sports nutrition supplements that legitimately enhance performance.* Our products contain the highest quality ingredients and absolutely no artificial colors. All NOW products are quality and purity tested.

We also heavily invest in the Informed-Choice/Informed-Sport certifications to assure our athletes that our products are steroid free, and the vast majority are also free of all banned substances. Informed-Sport is the world's leading anti-doping organization, so you can trust that NOW® Sports products are pure, safe, and effective for every level of athletics.

Our comprehensive sports nutrition line offers more than 140 products that cover the needs of everyone from the everyday fitness enthusiast to hardcore professional athletes, including pre-workout, intra-workout, post-workout, strength/mass training, endurance training, and recovery formulated products.* We also support current dietary trends and dietary restrictions by offering products that comply with ketogenic, paleo, Whole30®, dairy-free, gluten-free, and sugar-free lifestyles.

MASS BUILDING*

NOW® Sports offers premium nutrition supplements for even the most demanding mass-building goals.* Our high-quality supplements are tested for banned substances and certified by Informed-Sport/Informed-Choice.

CREATINE [PRE-WORKOUT/POST-WORKOUT]

Studies show that creatine supplementation can help maintain existing muscle tissue, support the growth and development of lean mass, and promote optimal performance during short bouts of intense exercise.*

KRE-ALKALYN®
750 MG CAPS
120 Caps 2055
240 Caps 2053

750 MG VEG CAPS
120 Veg Caps 2035

MONOHYDRATE POWDER
8 oz. 2030
21.2 oz. 2031
35.2 oz. 2032

ARGININE [PRE-WORKOUT]

Arginine Stack, a great pre-workout formula for mass building and energy production, combines several nutrients known to support optimal athletic performance including arginine, creatine, yerba maté, guaraná, and green tea extract.*

TROPICAL PUNCH POWDER
2.2 lbs 2005

HOW CAN I PUSH PAST MUSCULAR FAILURE?

At the end of a set when you have reached perceived muscular failure, rest for several seconds before completing another rep, then follow that up with another few seconds rest before doing one final repetition. This will encourage your muscles to go beyond their normal strength parameters.

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

AMINO ACIDS

A steady supply of amino acids fuel hard-working muscles when taken before, during, or even after exercise.* NOW® Sports amino acid are always the 'L' form amino acids and include a selection of all 20 common amino acids as well as the branched-chain amino acids (BCAAs).

As the building blocks of protein, amino acids are essential for building muscle and promoting post-workout recovery.*

AAKG (PRE-WORKOUT)

As AAKG, this form of arginine is a key player in amino acid metabolism and also important in protein synthesis and support of healthy immune function.*

3500 MG TABS
180 Tablets 0044
Vegan Non-GMO K

PURE POWDER
7 oz. 0205
Vegan Non-GMO K

AMINO-9 ESSENTIALS POWDER (PRE-WORKOUT/POST-WORKOUT)

This pure amino powder has all 9 essential amino acids in their superior free-form state and in the proportions recommended by the National Academy of Sciences to optimize protein synthesis and tissue repair for adults age 19 and over.* Athletes should take between meals and after training.

POWDER
330 g 0206
Non-GMO K

AMINO ACID COMBOS

Some things just go better together. NOW® Sports offers high-quality amino combinations for convenience and effectiveness.

ARGININE & CITRULLINE (PRE-WORKOUT)

The amino acids arginine and citrulline play an integral role in the body's metabolism and utilization of protein and are essential for the maintenance of muscle tissue.*

Non-GMO K

ARGININE & ORNITHINE [PRE-WORKOUT/POST-WORKOUT]

Arginine and ornithine combines two complementary amino acids in one convenient supplement and is popular with both athletes and active individuals.

BRANCHED-CHAIN AMINO ACIDS [PRE-WORKOUT/POST-WORKOUT]

BCAAs are critical for muscle protein synthesis.* Because BCAAs can be used as fuel during exercise, BCAA supplementation can help to preserve existing muscle tissue, so athletes should take before and after exercise.*

BCAA BIG 6 POWDER [PRE-WORKOUT/ INTRA-WORKOUT/POST-WORKOUT]

This is an advanced caffeine-free sports supplement, loaded with vegetarian BCAAs and formulated to support exercise endurance and recovery from intense workouts.*

CARNITINE [PRE-WORKOUT/POST-WORKOUT]

Carnitine helps maintain lean body weight through its role in transporting fatty acids into cellular mitochondria for energy production, a primary source of energy for resting muscles.*

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

*This statement has not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

CITRULLINE [PRE-WORKOUT]

Citrulline is a keto-friendly supplement that plays a unique role in the support of protein synthesis and positive nitrogen balance, particularly in muscle tissue, making it ideal for athletes and active individuals.*

L-GLUTAMINE [PRE-WORKOUT/POST-WORKOUT]

Glutamine helps to maintain a positive nitrogen balance crucial for any active individual, provides a fuel source for rapidly growing cells and helps to regulate the body pH to support homeostasis, which is critical for overall fitness.*

L-LEUCINE [PRE-WORKOUT/INTRA-WORKOUT/POST-WORKOUT]

Leucine Powder is instantized for easy mixing in water, beverages, or smoothies – no clumping. Studies suggest that leucine, in conjunction with adequate dietary protein, may help to build and maintain lean tissue and optimize body composition.*

PRO-GH™ POWDER [PRE-WORKOUT/POST-WORKOUT]

This amino acid supplement is formulated to support optimal sports performance with arginine, ornithine, lysine, and glutamine, which are critical for normal endocrine function and help to promote muscle tissue growth and recovery.*

L-ORNITHINE [POST-WORKOUT]

Ornithine is a fitness amino acid that supports healthy protein metabolism.*

WHY ARE AMINO ACIDS IMPORTANT?

No matter what sport or fitness regimen you engage in, you're always going to be a step behind without a steady supply of amino acids to fuel your hard-working muscles.* Three of the most important amino acids in sports nutrition are the Branched-Chain Amino Acids (BCAAs). They form the largest group of essential amino acids in the bodily pool (35 to 40%) and are present in high levels (14 to 18%) in muscle tissue. If you've been dieting and exercising but still not reaching your fitness goals, amino acids may be the missing link.*

ENERGY PRODUCTION*

World-class endurance athletes and casual exercisers alike need ample energy to fuel workouts. NOW® Sports offers a full line of energy-focused supplements to give everyone that extra boost needed to dig deep and take every workout to the next level.*

NEW! BCAA BLAST [PRE-WORKOUT]

With 5 g of BCAAs and 100 mg of natural caffeine per scoop, this thirst-quenching supplement assists in maintaining physical energy and focus during workouts, while supporting the body's natural recovery processes.*

TROPICAL PUNCH
600 g 0216

NATURAL RASPBERRY
600 g 0218

NEW! B-12 ENERGY BOOST STICKS [PRE-WORKOUT]

A powerful blend of vitamin B-12 (10,000 mcg), natural caffeine (50 mg), and nutrients like folate and taurine for supplying cellular energy production.* All in an on-the-go, super tasty powder stick!

B-12 ENERGY BOOST TART BERRY STICKS
12 Sticks 0503

NEW! CARBO GAIN [PRE-WORKOUT/INTRA-WORKOUT/POST-WORKOUT]

This is pure maltodextrin, a complex carbohydrate derived from non-GMO corn, which is easy for the body to digest and assimilate for energy production.

MALTODEXTRIN POWDER
2 lbs. 2020
8 lbs. 2023
12 lbs. 2019

DEXTROSE POWDER [PRE-WORKOUT/INTRA-WORKOUT/POST-WORKOUT]

Dextrose is a simple sugar that is the primary source of energy for the body, which helps fuel intense activity, maintain exercise endurance, and support recovery from exercise.*

CARBOHYDRATE POWDER
10 lbs. 6924

ENERGY EXTREME [PRE-WORKOUT]

With a full complement of B vitamins and other cofactors such as chromium, magnesium malate, and carnitine, this formula supplies the nutrients needed to promote sustained energy production and mental alertness.*

VEG CAPS
90 Veg Caps 3352

D-RIBOSE [PRE-WORKOUT]

Ribose is a simple sugar that occurs naturally in all living cells, supporting ATP production and supplying muscle fuel.*

750 MG VEG CAPS
60 Veg Caps 2144
120 Veg Caps 2145

POWDER
4 oz. 2146
8 oz. 2147
16 oz. 2137

PYRUVATE [PRE-WORKOUT]

Pyruvate, or pyruvic acid, is involved in a number of the body's metabolic processes, including the metabolism of fat and carbohydrates; the storage of glycogen; and the production of cellular energy.* It's basically fuel for your cells.*

600 MG VEG CAPS
100 Veg Caps 2240

WEIGHT MANAGEMENT*

If you're devoted to managing your weight the healthy way but still want to maximize your committed efforts, nutrition support and weight management supplements from NOW® Sports can help take your healthy, strong lifestyle to the next level.* At NOW we understand that, even with a healthy diet and consistent exercise, some of us just

need a little extra help maintaining a fit body composition.* Our targeted selection of diet and weight management products feature only quality ingredients.*

CLA EXTREME (PRE-WORKOUT)

CLA Extreme™, which combines guaraná and green tea extract with conjugated linoleic acid, helps support healthy fat metabolism and energy production, especially when used along with an exercise program and a healthy diet.*

750 MG SOFTGELS
90 Softgels 1731
180 Softgels 1733

T-LEAN® EXTREME (PRE-WORKOUT)

T-Lean® Extreme features GreenSelect® Phytosome, a standardized green tea extract with superior bioavailability, which has been clinically tested and shown to promote a healthy metabolic rate and support weight management when used alongside a well-balanced diet and exercise.*

VEG CAPS
60 Veg Caps 1923

KETO FRIENDLY! MCT OIL (PRE-WORKOUT)

Medium-chain triglycerides (MCTs) are fats found naturally in coconut oils and more easily and rapidly digested than other types of fats. MCT oil's thermogenic properties encourage the use of fat for energy rather than for storage, and numerous studies suggest that substituting MCT Oil for other fats in a healthy diet may therefore help to support healthy weight and body composition.*

PROTEIN POWDERS

Protein is the foundation of sports nutrition, and muscles need lots of protein to function and recover after exercise. Give hard-working muscles the fuel needed to meet any challenge with the great variety of NOW® Sports protein powders. Our protein powders never use artificial flavors and are perfect for athletes looking for clean products that taste great. From traditional varieties of whey to innovative plant-based options, NOW has protein powder options for every diet type including vegan and keto friendly.

BONE BROTH PROTEIN POWDERS (POST-WORKOUT)

Chicken and Beef Bone Broth Protein Powders are both products of the USA and are natural sources of protein, amino acids, collagen, and more. These paleo-friendly protein products are made of premium-quality bone extract without artificial ingredients and are free of many common allergens, making it an ideal source of protein for individuals with food sensitivities.

CHICKEN BONE BROTH
1.2 lbs. 1962

BEEF BONE BROTH
1.2 lbs. 1960

CASEIN

Micellar Casein is a slowly digested, complete protein, with an excellent amino acid profile that typically has over 4,500 mg of branched-chain amino acids per 1 scoop serving. It mixes easily and is an ideal choice for sustained protein support.

UNFLAVORED
1.8 lbs. 2122

EGG WHITE (POST WORKOUT)

Egg White Protein Powder rates as one of the highest quality proteins available when measured using the Protein Digestibility Corrected Amino Acid Score. This powder can also be used in recipes by mixing two tablespoons of powder with six tablespoons of water to equal two egg whites.

UNFLAVORED
1.2 lbs. 2040
5 lbs. 2043

CREAMY CHOCOLATE
1.5 lbs. 2044

CREAMY VANILLA
1.5 lbs. 2046

PEA PROTEIN (POST-WORKOUT)

Pea Protein is a non-GMO vegetable protein isolate and is an ideal source of post-workout nutrition for athletes who may have difficulty supplementing with other types of protein.

ORGANIC UNFLAVORED
1.5 lbs. 2108

PURE UNFLAVORED
12 oz. 2132
2 lbs. 2135
7 lbs. 2124

CREAMY CHOCOLATE
2 lbs. 2133

VANILLA TOFFEE
2 lbs. 2134

PLANT COMPLEX (POST-WORKOUT)

Plant Protein Complex is formulated with a non-GMO vegan protein blend from pea, hemp, and quinoa sources. Competitive athletes who are regularly tested should check with their sanctioning body for the status of hemp.

CHOCOLATE MOCHA

2 lbs. 2100
6 lbs. 2102

CREAMY VANILLA

2 lbs. 2129
6 lbs. 2216

SOY (POST-WORKOUT)

Soy Protein Isolate is a good vegetable source of high-quality complete protein with an excellent amino acid profile.

UNFLAVORED

1.2 lbs. 2156
2 lbs. 2152

CREAMY CHOCOLATE

2 lbs. 2143

CREAMY VANILLA

2 lbs. 2142

SPROUTED BROWN RICE (POST-WORKOUT)

Sprouted Brown Rice Protein Powder is ideal for active individuals with allergies and sensitivities to ingredients such as whey, egg, and soy. It's natural and pure, with no added ingredients, and mixes easily into drinks and smoothies.

UNFLAVORED

2 lbs. 2206

WHEY (POST-WORKOUT)

Looking to give your baked goods a little protein boost? The rule of thumb is 1/3 of the flour in a recipe can be exchanged with whey protein powder.

CONCENTRATE Whey Protein Concentrate, including BCAAs, is a high-quality protein that is both bioavailable and easily digested, making it perfect to mix into before, during, or after workout drinks or smoothies. Great for active individuals hitting the gym every day!

UNFLAVORED

1.5 lbs. 2298
5 lbs. 2299

ORGANIC

1 lb. 2205

GRASS-FED

Grass-Fed Whey Protein is ideal for active individuals seeking the most wholesome milk protein for themselves and their families. It's concentrated from pure milk collected exclusively from grass-fed cows that are pasture-raised without any synthetic growth hormones (rBGH), antibiotics, or pesticides.

CREAMY CHOCOLATE
1.2 lbs. 2098

CREAMY VANILLA
1.2 lbs. 2099

UNFLAVORED
1.2 lbs. 2101

ISOLATE

Whey Protein Isolate yields more protein with less fat and carbohydrates than concentrates and are instantized for easy mixing in milk or water. For athletes on high protein regimens and for those aggressively seeking to build muscle, isolate is ideal.

CREAMY STRAWBERRY
2 lbs. 2178

WHEN'S THE OPTIMAL TIME TO CONSUME PROTEIN?

Muscles are the most receptive to fuel 15 to 30 minutes after exercise when your metabolic window is open. Try consuming a protein/carbohydrate shake during this window. The body can absorb twice the amount of carbohydrates immediately following a workout.

Not sure which protein powder is right for you? Check out our Protein Powder Chooser Tool at nowfoods.com/pickmyprotein

MEN'S HEALTH

Combined with a healthy diet and lifestyle, sports and dietary supplements are a stellar way to ensure you get the right levels of vitamins, nutrients, and body fuel needed to maximize your hard work spent during training sessions. If you place a premium on clean, pure, effective workout supplements that support a fit, active lifestyle, then NOW® Sports products are made just for you.

IGF-1

IGF-1 (Insulin-Like Growth Factor) is a small polypeptide that plays a critical role in the proper regulation of adult cellular growth in almost all tissue types.* NOW® IGF-1 is extracted from New Zealand deer antler velvet. Competitive athletes who are regularly tested should check with their sanctioning body for the status of this supplement.

ENDURANCE*

Endurance athletes are always striving for optimal performance, and sports supplementation is a very important aspect of daily training for endurance sports. Proper supplementation may help to increase speed, reduce times, and help push through fatigue for a stronger finish.* For peak performance, the body demands nutrients to stay strong, fast, and focused.*

BEET ROOT POWDER [PRE-WORKOUT]

This superfood powder is a pure derivative from non-GMO beets and naturally abundant in a variety of nutrients including nitrates.

POWDER

12 oz. 5055

BETA-ALANINE [PRE-WORKOUT]

Beta-Alanine is backed by scientific research demonstrating that CarnoSyn® supplementation results in delayed muscle fatigue and rapid recovery time, thereby helping attain strength and endurance training goals.*

750 MG VEG CAPS

120 Veg Caps 2008

POWDER

17.6 oz. 2007

CARBO ENDURANCE [PRE-WORKOUT/INTRA-WORKOUT]

Carbo Endurance provides an energy source from isomaltulose, which has the same caloric value as other sugars (4 kcal/g), but its sustained release makes it an excellent choice for fueling endurance athletes.

POWDER

2.5 lbs. 2056

WAXY MAIZE [PRE-WORKOUT/INTRA-WORKOUT/POST-WORKOUT]

Waxy maize supports glycogen resynthesis well after working out, sustaining energy levels throughout the day.*

POWDER

5.5 lbs. 2014

HOW CAN I INCREASE ENDURANCE?

- A smaller calorie meal of complex carbohydrates and protein (avoiding dietary fats) several hours prior to exercise will strengthen your performance.
- In a typical diet you usually get enough electrolytes to sustain the first 60-90 minutes of moderate exercise. After 90 minutes water is no longer enough and that is when electrolytes need to be replenished.

RECOVERY*

Rest and recovery are essential components of any worthy workout routine – overall impacting potential fitness gains. Stretching at a low intensity after a workout helps remove lactic acid from your muscles, reducing stiffness and soreness. But is stretching alone enough? Protein is absolutely

essential post-workout to help muscles recover and rebuild after exertion.

NOW® Sports offers a full line of recovery supplements to make sure you get the most out of training programs.*

NEW! EFFER-HYDRATE EFFERVESCENT TABLETS [INTRA-WORKOUT/POST-WORKOUT]

This line of effervescent, electrolyte tablets are made to help athletes and fitness enthusiasts of all levels rehydrate and recover.* The convenient pocket size makes stashing a tube of these in a gym bag super easy for on-the-go replenishment and recovery.*

LEMON LIME
10 Tab Tube 2241

MIXED BERRY
10 Tab Tube 2242

ORANGE STRAWBERRY
10 Tab Tube 2243

NEW! EFFER-ENERGY EFFERVESCENT TABLETS [PRE-WORKOUT/INTRA-WORKOUT]

In addition to recovery, Effer-Energy effervescent electrolyte tablets are made to provide energy to athletes or anyone who wants to put some pep in their step.*

TROPICAL PUNCH
10 Tab Tube 2248

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

HMB [PRE-WORKOUT/POST-WORKOUT]

HMB is a clinically researched, naturally occurring metabolite of the branched-chain amino acid leucine. It helps maintain muscle strength and mass when combined with regular exercise and a healthy diet and may help to enhance recovery from intense exercise.*

500 MG VEG CAPS
120 Veg Caps 2054

1000 MG TABS
90 Tabs 2058

POWDER
90 g 2057

ZMA® [POST-WORKOUT]

ZMA® is a combination of zinc, magnesium, and vitamin B-6. It is designed to maximize absorption and to promote recovery from exercise.*

VEG CAPS
90 Veg Caps 2200
180 Veg Caps 2201

HOW CAN I HELP MY BODY RECOVER?

- Eat plenty of protein and complex carbohydrates. If you don't give your body food high in protein and carbs it will begin to take it from your muscles.
- Muscles need anywhere from 24 to 48 hours to repair and rebuild.
