

# 5 Ways to Grow Immunity

Sick days are inevitable for kids, but natural solutions can protect little ones and blossom their immune response.

## Dr. Murray Clarke's Immune Essentials

### First Defense

- Made with olive leaf extract, a powerful tonic sourced from olive trees
- Contains lab-tested colloidal silver, St. John's Wort and zinc
- Convenient liquid format

### Probiotics with Colostrum Tablets

- Combines prebiotics, probiotics and first-milking colostrum in 1 serving
- Contains 4 billion colony-forming units (CFU) per serving – the good bugs!
- Kid-approved mixed berry flavor chewable tablets

### Vitamin C

- Formulated specifically for kids starting at 6 months to teens
- World's highest quality sourced ingredients
- Easy-to-swallow liquid for optimal absorption

### Echinacea

- Contains 2 potent, absorbable and bioavailable species of echinacea
- Flavored with natural orange essential oil
- Easily add drops to any kid's drink

### Elderberry Super Immune SoftMelts™

- Packed with Wellmune® Beta Glucan, Elderberry, Vitamin C and Folate
- Non-Gummy Gummies™ with 0 grams added sugar
- No artificial flavors, colors or sweeteners

**Dr. Murray Clarke** is a practicing holistic pediatrician and the founder of ChildLife Essentials®, the only line of nutritional supplements formulated exclusively for infants and children. When he noticed a dramatic increase in his young patients suffering from illnesses like immune deficiencies, Dr. Clarke used extensive research from his pediatric practice and many medical modalities (including Western Medicine, Homeopathy and Naturopathic Medicine) to formulate this line of quality, fast-absorbing nutrients.
