ChildLife® Essentials presents its newest vitamin delivery format: SoftMelts™

## The Non-Gummy Gummies™

- Better than traditional gummy supplements which tend to be packed with sugar, our ChildLife® Multi Vitamin SoftMelts™ has natural sugar-free sweetening agents such as Stevia and Xylitol.
- Provides an easy-to-chew option with a great taste!
- Our SoftMelts™ are individually packaged in blister cards, with each one maintaining its moisture, unlike a traditional bottle of gummies which tends to dry out over time.

### Carefully-Selected Ingredients

Our product is formulated with children's health in mind. The vitamins included in this formula have been carefully selected for their importance in maintaining optimal health.

### Antioxidant Activity, Immune Health, & Normal Energy Maintenance

The ingredients in this formula contribute to overall health by supporting a healthy immune system, providing antioxidant support, and facilitating normal energy production.

**Vitamin A** plays several important roles in maintaining health by promoting normal growth and development, maintaining healthy vision, and enhancing immune function.<sup>1-3</sup>

**Vitamin E**, which is often valued for its antioxidant potential, has also been shown to contribute to the immune system, by enhancing the immune response.<sup>4</sup>

**Vitamin D3** supports healthy bones and contributes to a healthy immune system.<sup>5</sup>

**Zinc** and **Selenium** both assist in the body's antioxidant activities, and adequate levels contribute to a healthy immune response.<sup>6-7</sup>

**B Vitamins** included in this formula, contribute to normal cellular metabolism and energy production. Many of the B Vitamins have interrelated roles, and depend on the presence of other B Vitamins for proper functioning.<sup>8</sup> It is important to obtain the essential B Vitamins daily for optimal well-being. ChildLife® Multi Vitamin SoftMelts™ offers several B Vitamins all in one supplement.
