"Psychedelics (serotonergic hallucinogens) are powerful psychoactive substances that alter perception and mood and affect numerous cognitive processes. They are generally considered physiologically safe and do not lead to dependence or addiction."
Pharmacol Rev. 2016 Apr; 68(2): 264–355

Schedule I Status

- State vs. Federal tension
- "Microdosing"

SAMHSA
Substance Abuse and Mental Health Services Administration
5600 Fishers Lane • Rockville, MD 20857

SAMHSA agrees that too many Americans are suffering from mental health and substance use issues, which have been exacerbated by the ongoing COVID-19 pandemic, and that we must explore the potential of psychedelic-assisted therapies to address this crisis. SAMHSA also agrees that the use of psychedelic medicines will require a broad-spectrum interdisciplinary stakeholder approach to effectively tackle the complexity of issues that stakeholders anticipate will arise with their introduction.

Hemp/CBD: Lessons Learned

AMIN | TALATI
WASSERMAN

- Post-2018 Farm Bill boom
- Hemp-derived THC excluded from Schedule I
 - 0.3% concentration limit specific to delta-9 THC within the definition of “hemp”
 - Ninth Circuit decision on delta-8 THC
- FDA (and state) considerations
 - Synthetic botanicals are not “dietary supplements”
 - IND preclusion
 - Adulteration
 - Safety, cGMPs
 - Claims

This is an official
CDC
HEALTH ADVISORY

DELTA-8 THC HAS SERIOUS HEALTH RISKS

CBD and Consumable Hemp Items.
