

# Patent-Pending Brain + Body Support for Pregnancy

Formulated with AlphaSize®, the ONLY Alpha-GPC approved for prenatal use in the U.S.

This one a day, easy-to-swallow softgel features a patent-pending combination of AlphaSize® A-GPC, DHA, and select essential vitamins and minerals which are designed to support optimal fetal development, maternal health, brain and cognitive function from the start.

Patent-Pending  
Blend

AlphaSize® A-GPC  
+Omega-3s (DHA/EPA,  
IFOS-Certified) +  
Essential Nutrients

WE  
CREATE  
NUTRIENTS

## Nutrient Highlights

### AlphaSize A-GPC-205mg

A source of choline that resembles that which is found in breast milk and cows milk.

Supports neural tube, nervous system and cognitive development.

Free from impurities, highly bioavailable and crosses the blood brain barrier.

### Omega 3, DHA/EPA IFOS 240mg

[200mg DHA:40mgEPA]

Supports the development of healthy brain, eyes, language and listening skills, eye hand coordination and problem solving.

Folic acid contributes to the growth of maternal tissues during pregnancy.

Low maternal folate is a risk factor for neural tube defects in the developing fetus.

Folic acid and vitamin B12 contribute to the process of cell division.

Iron is a requirement during pregnancy to support both maternal reserves and fetal development.

Iron plays a key role in oxygen transport and cell division.

During pregnancy, iodine requirements increase.

This element helps develop normal cognitive function.

Vitamin D supports calcium absorption during pregnancy, and is essential for healthy bone development in children, adequate levels are needed.
