

GINGEREN™

Long acting ginger granules

SUPPORTING WOMEN THROUGH EVERY MONTH.

Long-acting Ginger for Menstrual Comfort & Sexual Well-Being

Gingeren™ Quick Facts:

- Long-acting, sustained-release ginger granules
- Clinically studied for primary dysmenorrhea & sexual health
- Effective from cycle 1 post dosing
- Statistically significant reduction in menstrual pain & discomfort (VAS, WaLIDD)*
- Supports normal daily functioning and maintain comfort during routine activities*
- Supports healthy sexual desire & overall sexual well-being*
- Alkemist Assured Botanical certified (3rd party verified)
- Improved tolerability, Low dose support (200 mg/day)

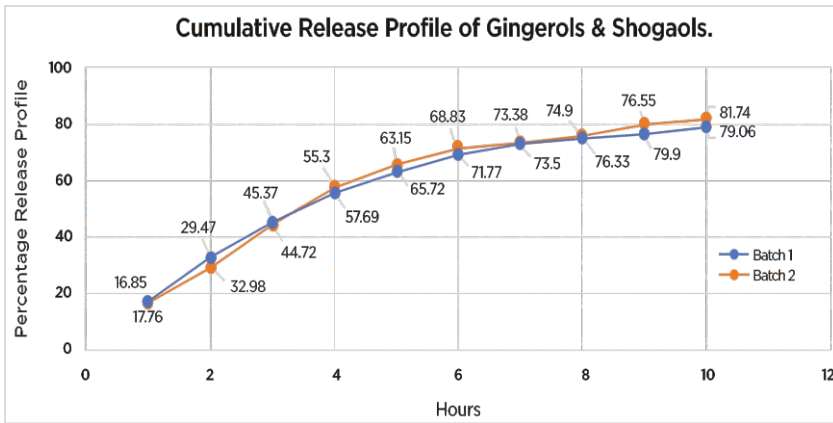

**These outcomes were statistically significant compared to placebo in the clinical study*

Gingeren™ is a long-acting, sustained-release ginger granules, developed to support women's menstrual comfort and sexual well-being. Ginger has been traditionally used for its anti-inflammatory and antioxidant properties; however, the key bioactive compounds—gingerols and shogaols have a shorter half-life, limiting its efficacy. Gingeren™ is designed to deliver the actives in a sustained release manner for improved efficacy at a low dose.

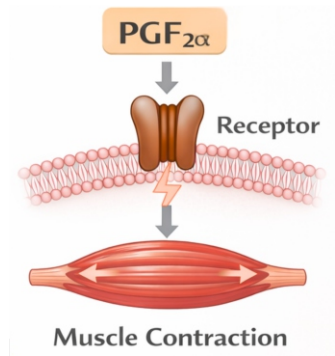

Backed by clinical research, Gingeren™ has demonstrated significant improvements in reducing dysmenorrheic pain, menstrual distress, menstrual blood flow, and $PGF_2\alpha$ levels, along with alleviating gastric discomfort and cold-related symptoms. It also supports improved overall working ability, digestive health, and overall sexual quality of life, including arousal, desire, lubrication, orgasm, and satisfaction in women.

SUSTAINED EFFICACY

80% of sustained release of gingerols achieved during 10th hour

Proven Mechanism of action

↓17% reduction in PGF₂α levels
(regulates uterine muscle contractions)

LOW-DOSE HOLISTIC SUPPORT

Condition
Women with regular sexual life and moderate (VAS Score ≥4 to ≤6) primary dysmenorrhea symptoms

Participants
N= 100; Women aged ≥ 20 and ≤ 30 years

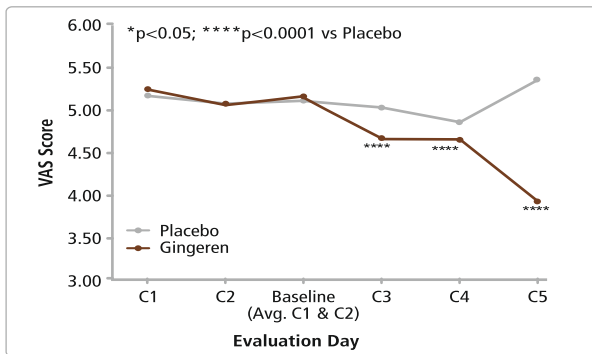

Duration & Evaluation
Pre-dose (C1 & C2) & post-dose (C3, C4 & C5)

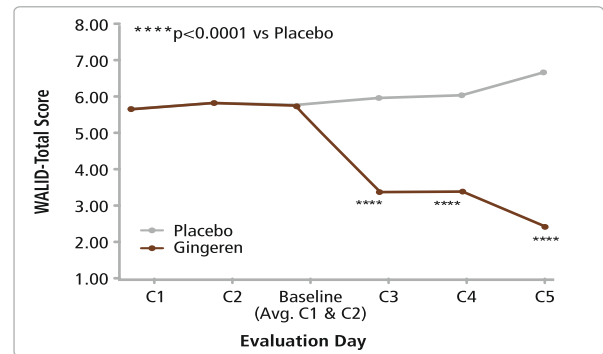

Dose
200mg /Day

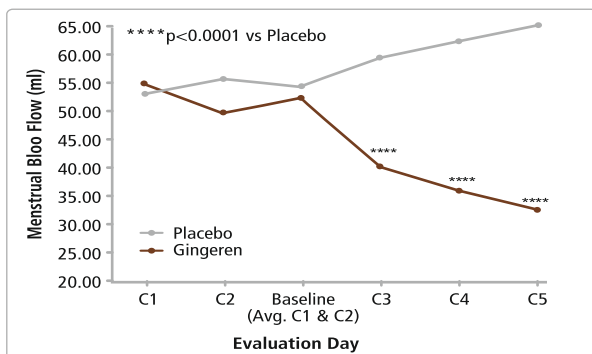

34% reduction in VAS pain score

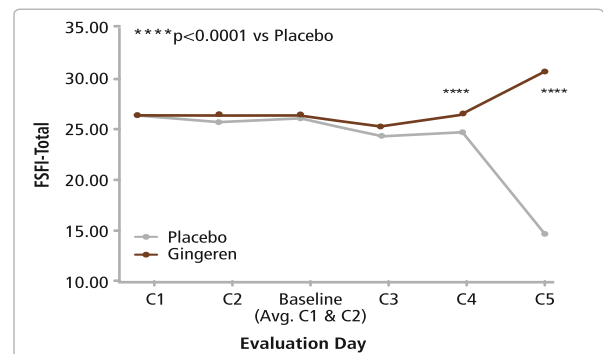

68 % Reduction in Total WALLID score (working ability, pain location, no. days & pain intensity)

44 % Reduction in Menstrual Blood Flow

51.58% improvement in FSFI-Total (Sexual desire, arousal, lubrication, orgasm, satisfaction & pain)

Other Parameters:

- 47% ↑ improvement in Sexual quality of life
- 56% ↓ reduction in gastric discomfort
- 64% ↑ improvement in digestive health
- 38% ↓ reduction in cold symptoms
